**Derwent Title:** Motor vehicle collision warning system has an additional capability for detecting the possibility of a collision being caused by opening of the motor vehicle door into the path of an oncoming object

**Original Title:** EP1375267A2: Process and system for the detection of an accident risk

**Assignee:** BOSCH GMBH ROBERT Standard company  
Other publications from [BOSCH GMBH ROBERT \(BOSC\)](#)...

**Inventor:** KLOTZ A; SCHMID D;

**Accession/** 2004-101077 / 200415

**Update:**

**IPC Code:** B60R 21/34 ; G08G 1/16 ; G08G 1/00 ;

**Derwent Classes:** Q17; S02; W06; X22;

**Manual Codes:** S02-B01(Measuring distances in line of sight; optical rangefinders) , W06-A04H1(Anticollision) , W06-A05H1 (Vehicle applications) , W06-A05H1K(Anticollision) , W06-A06H1A(Land vehicles) , W06-A06H1K(Anticollision) , X22-E13(Collision-imminence alarm)

**Derwent Abstract:** (EP1375267A) **Novelty** - The method for detecting the risk of a collision in which distance sensors (4) for detecting objects (6) within the detection area (5) of a motor vehicle (1) generate signals when the vehicle is moving relating to a collision risk and also generate signals when the vehicle is stationary and there is a risk of a collision with an object due to opening of the motor vehicle door (7).

**Detailed Description** - An INDEPENDENT CLAIM is made for a motor vehicle collision warning device for generating a first signal when there is a risk of a collision when the vehicle is moving and for generating a second signal when the vehicle is stationary and there is a risk of a collision being caused by opening of the vehicle door into the path of an oncoming object.

**Use** - Motor vehicle collision warning system for warning of possible collision due to opening of vehicle door.

**Advantage** - Expansion of a vehicle collision system by the addition of a stationary operating mode greatly increases safety and is particularly effective for preventing collisions caused by opening of a vehicle door into the path of oncoming objects, e.g. cyclists.

**Images:**

**Description of Drawing(s)** - The figure shows a schematic view of an inventive system.
